

Laser cleaning machine parameter

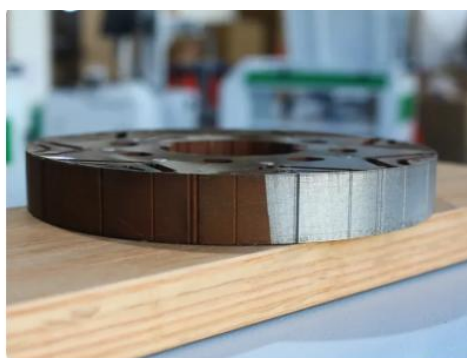

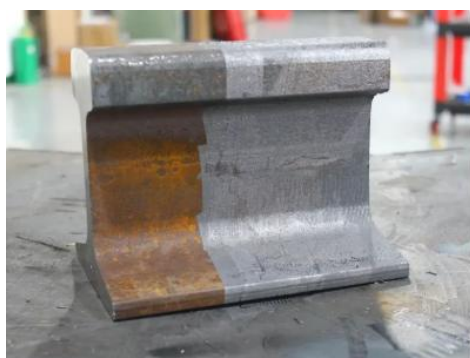

Laser power	1500W
Laser wavelength	1070nm±20nm
Laser source	JAX
Cooling system	air-cooled system
Fiber length	10m
Operating mode	Handheld Cleaning System
Machine weight	61KG

HANTEN

Spare parts for HANTENCNC machines

1		Advanced air cooling system The laser rust remover does not require bulky water cooling, it is equipped with a compact air-cooled chiller, which saves space, keeps the machine compact and ensures its reliability, making it more flexible and easier to move. Test data shows that the laser rust remover can work continuously for 24 hours in an environment from -10°C to +40°C.
2		The laser cleaning machine has a suitcase design with both a top and pull handle, allowing it to be easily carried or moved on wheels. It also comes with a swivel handle and four double-swivel casters for smooth and safe movement. These features ensure convenient, portable and flexible cleaning – without compromising on efficiency.
3		Laser cleaning gun - compact, intelligent, efficient Easy to use: Simple operation, easy to learn, comfortable for long-term use. Stable performance: Real-time monitoring of all parameters helps prevent problems and ensures smooth operation. Intelligent control: Built-in control system with safety alarms for safer and more reliable use. Fast cleaning: Cleaning width up to 300mm for higher efficiency.
4		Stable and flexible mobility Our laser cleaning machine has four double-swivel wheels that reduce vibrations, support the weight of the machine and ensure smooth movement - even on uneven or rough surfaces. The compact design of the wheels also allows for easy turning in tight spaces.
5		Robust frame design The machine has a new frame design. This improves stability and allows for easier adjustment compared to older enclosed models. Its robust frame withstands heavy loads and vibrations. This ensures reliable performance over time, even in harsh conditions. It also provides excellent protection.

Our services

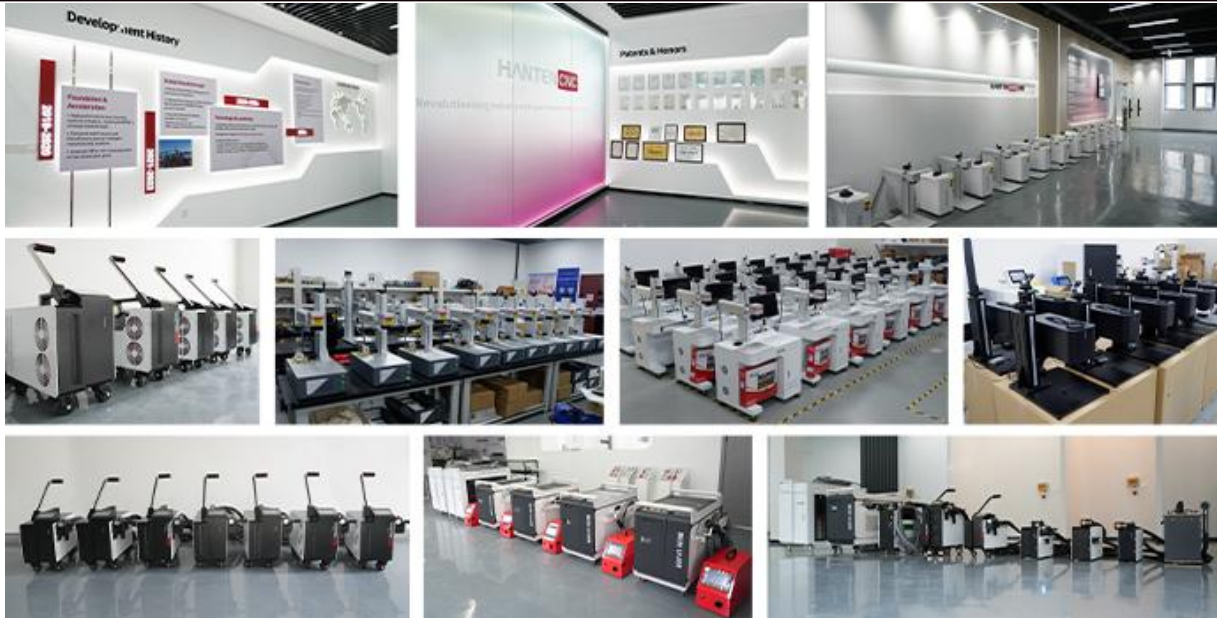

Pre-sales service

- * One year warranty for the whole machine, two years warranty for the laser source, damage without human responsibility.
- * Support for inquiry and consultation.
- * Support for sample testing.
- * Tour our factory.
- * More than 95% timely response rate, timely response to customer inquiries.

After-sales service

- * Machine installation training, machine use training.
- * Technicians are available to service machines overseas.
- * Use online contact methods such as WhatsApp, Facebook and Move Phone to provide online customer service.

About HANTENCNC

HANTENCNC – A world leader in laser equipment manufacturing, specializing in OEM customization and high-precision laser cleaning/marking/welding solutions.

Key Strengths:

Deep Customization: Brand Implantation, Hardware/Software Personalization, Multi-Language User Interface, and Instant Logo Printing.

Rigorous Quality Control: 72-hour pre-shipment testing, advanced inspection tools, and factory audit support for guaranteed reliability.

Innovative Technology: 20 years of experience, over 20 patents, partnerships with JPT/MAX, and global voltage compatibility (100-220V).

Worry-Free Service: 2-hour response, lifetime support, free samples, and extensive parameter library for rapid production.

Global recognition: We operate in 120 countries, over 36,000 clients, are trusted by Foxconn, and have CE/FDA certifications.
